

## FALL RETREAT

Choose an Advocate from your church and send them to our inaugural Advocates Retreat, October 21-22, at Bonclarken.

At this 24-hour retreat, Advocates will:

- develop relationships
- learn new information
- gain motivation

This is a combined retreat of ONA and World Witness Advocates. The retreat is an opportunity, not a requirement.

*Interested?*

**YOUR CHURCH CAN**

*become mobilized through  
the Go2 Initiative*

## YOUR CHURCH CAN

Begin by recruiting an Advocate to be a communication link between your church and ONA and the church planting work in your presbytery. An Advocate doesn't have to be a church officer, but needs to be someone passionate about the role and who is an influencer in the congregation to:

**A - Advocate** the need for church planting in the ARP and possible opportunities to be involved.

**R - Raise** the home missions mindedness in the congregation by keeping the congregation informed and looking for opportunities to educate them.

**P - Participate** in a quarterly Zoom call with other Advocates. These meetings aim to help Advocates learn from one another, become more informed about what is happening with church planting in the presbyteries of the ARP, and discover best practices for how churches can support church planting in the ARP and in their presbytery.

Advocates can set their own goals based on their perception of what would be reasonable but faith stretching goals for their church's involvement.

# Go2 : Mobilizing ARP Churches

We invite your church to join the Go2 Initiative with ONA and World Witness

For ONA, Go2 aims to help churches become informed, engaged, and mobilized in support of church planting. A church can be mobilized in prayer, financial support, and sending people to help.

The goal is to develop a grassroots movement for church planting where the majority of our congregations are involved in some way. The grassroots movement would also see more and more church planters developed within our churches rather than being recruited from outside the ARP.
